JavaScript (ES6+)	HTML	CSS/SASS	TypeScript	Angular	HTTP	REST API
WebStorage	Algorithms		Data structures		Event Loop	OOP
Semantic markup	Adaptive markup		Responsive markup		BEM	VSCode
NPM	Webpack	Git & GitHub	DevTools	Figma		Perfect Pixel

About me:

I'm a switcher and I'm looking for my first job as a frontend developer.

Previously I dealt with delivery and customs clearance issues in a small trading company. My passion for programming began with the need to solve one frequently recurring work task. I created my own solution for calculating of customer order parameters and used it actively. Since then, I've been constantly haunted by the question of what I actually want to do at my work. About a year ago I quit my job in logistics and immersed myself in learning of frontend.

Most of all in the web development I'm inspired by the unlimited ability to create cool things of any complexity with just one laptop and immediately see the result of my actions.
