Skills:

JavaScript (ES6+) HTML CSS/SASS TypeScript Angular HTTP REST API
WebStorage Algorithms Data structures Event Loop OOP Semantic markup
Adaptive markup Responsive markup BEM VSCode NPM Webpack Git & GitHub
DevTools Figma Perfect Pixel

About me:

I'm a switcher and I'm looking for my first job as a frontend developer.

Previously I dealt with delivery and customs clearance issues in a small trading company.

My passion for programming began with the need to solve one frequently recurring work task. I created my own solution for calculating of customer order parameters and actively used it. Since then, I have been constantly haunted by the question of what I actually want to do at my work.

The turning point in the decision to change professional activity was my moving from Minsk to St. Petersburg. I joined a frontend course of Rolling Scopes School, devoting all my time to learning.

Most of all in the web development I am inspired by the unlimited ability to create cool things of any complexity with just one laptop and immediately see the result of my actions.

It's hard for me to say what I like the most – coding or layout design. A 50/50 ratio would be perfect for me.

I code in Angular, but I'm ready to learn any other framework or library.

I dream of becoming a part of a project and team, upgrade my skills and grow into more competent developer.

You can find more information about me and my projects on the webpage: <https://elizaveta-ivanushenko.netlify.app/>

Education and Experience:

September 2021
— May 2022

Student

Rolling Scopes School: <https://rs.school>

Angular Course: <https://rs.school/angular/>

Certificate: <https://app.rs.school/certificate/3nfa3a39>
