JavaScript (ES6+)   HTML   CSS/SASS   TypeScript   Basics of Angular   HTTP   REST API
WebStorage   Algorithms   Data structures   Event Loop   OOP   Semantic markup
Adaptive markup   Responsive markup   BEM   VSCode   NPM   Webpack   Git & GitHub
DevTools   Figma   Perfect Pixel

About me:

I had a non-IT job, but I couldn't do without specialized software and technological solutions, which were always easy for me to use (1C: Enterprise, Bitrix24, e-Declarant, Wialon).

One day I remembered some knowledge from my university computer science course and tried to solve one of my everyday work problems using programming. The process of working on my own small program once again convinced me of the idea - my current profession is not something I actually want to do in the coming years.

This is why I intentionally quit my job in logistics and joined Rolling Scopes School's frontend course, dedicating all my time to learning.

And now I feel strong enough to become a part of real project and team, upgrade my skills and grow into more competent developer.

You can find more information about me and my learning projects on the webpage: **https://elizaveta-ivanushenko.netlify.app/**
