JavaScript (ES6+)	HTML	CSS/SASS	TypeScript	Angular	HTTP	REST API
WebStorage	Algorithms	Data structures		Event Loop		OOP
Semantic markup	Adaptive markup	Responsive markup		BEM		VSCode
NPM	Webpack	Git & GitHub	DevTools	Figma		Perfect Pixel

About me:

I'm a switcher and I'm looking for my first job as a frontend developer.

Previously I dealt with delivery and customs clearance issues in a small trading company. My passion for programming began with the need to solve one frequently recurring work task. I created my own solution for calculating of customer order parameters and actively used it. Since then, I've been constantly haunted by the question of what I actually want to do at my work. About a year ago I left my job in logistics and immersed myself in learning of frontend.

Most of all in the web development I am inspired by the unlimited ability to create cool things of any complexity with just one laptop and immediately see the result of my actions.
